

HighPoint Solutions, LLC and Entimo Announce Key Partnership

EAST NORRITON, PA — May 7, 2015 — HighPoint Solutions, LLC., a premier management consulting and specialized IT consulting firm for the pharmaceutical and medical device industries, announced today that they will be entering a strategic partnership with trusted provider, Entimo.

Entimo, a highly specialized, product-focused software company, offers an integrated clinical environment (entimICE) – a truly metadata-driven, configurable and regulatory compliant solution platform for life sciences. Their product portfolio enables customers to implement an end-to-end process from standards governance and study setup to statistical analytics and submission in an efficient, validated and reproducible way.

With US Headquarters in East Norriton, PA and European Headquarters in Geneva, Switzerland, HighPoint is uniquely positioned to deliver practical solutions that solve business problems for Life Sciences and Healthcare manufacturers. HighPoint provides a full range of business and technology services in the areas of Research & Development, Commercial Excellence, Pricing & Market Access, Quality, and Pharmacovigilance. HighPoint’s continued model of partnering with best in class products and companies, allows them to offer domain solutions for a manufacturer’s needs.

“We’re proud to be Entimo’s strategic partner,” says Arnab Sikder, HighPoint’s EVP and GM of European Operations. “With this partnership, HighPoint Solutions can help Entimo’s life sciences clients leverage technology to better manage standards across the clinical drug development process. We are excited about new opportunities which emerge through our partnership.”

HighPoint Solutions will strengthen Entimo’s product offering by providing strategic consulting services in the area of standards management, planning, implementation, and managed services for the entimICE product line - a new generation of configurable, high-performance analytical solutions which optimize business processes and fulfill the regulatory requirements of the pharmaceutical industry, globally.
